A Project Report On
"A STUDY ON THE EMPLOYEES ENGAGEMENT DURING REMOTE WORKING, INNOSOUL INFORMATION TECHNOLOGIES PVT LTD.HYDERABAD"

SUBMITTED IN THE PARTIAL FULFILLMENT OF REQUIREMENT FOR

THE AWARD OF THE DEGREE OF

MASTER OF BUSINESS ADMINISTRATION

By

KOWTALAM AJITH KUMAR

23JC1E0076

Under the Guidance of

Mr. CTM Nagesh, MBA,

Assistant Professor

Bheemi Reddy Institute of Management Science, Adoni

(Affiliated to JNTUA, Ananthapuram)

CERTIFICATE

This is to certify that MR K. Ajith Kumar, Reg No. 23JC1E0076, has successfully completed the project report titled "A STUDY ON THE EMPLOYEES ENGAGEMENT DURING REMOTE WORKING, INNOSOUL INFORMATION TECHNOLOGICS PVT LTD.HYDERABAD" In partial fulfilment of the award of the degree of Master of Business Administration, under the guidance of Mr CTM Nagesh, MBA, Assistant Professor, Bheemireddy institute of Management Science, Adoni during the academic year 2024-2025

Signature of the Guide

DECLARATION

I MR K. Ajith Kumar Reg No. 23JC1E0076, studying in MBA IV semester hereby declare that the project work titled "A STUDY ON THE EMPLOYEES ENGAGEMENT DURING REMOTE WORKING, INNOSOUL INFORMATION TECHNOLOGICS PVT LTD.HYDERABAD" and is submitted by me.

I also declare that information gathered and presented in project was collected directly from customers/employees/respondents of Innosoul Information Technologies Pvt Ltd, Hyderabad. It is not copied from any other sources. The information is confined only for academic purposes.

I also declare that this project has not been submitted previously to any other university or institution for the award of any other degree or diploma.

Place: Adoni **STUDENT NAME**

Date:

ACKNOWLEDGEMENT

It is my privilege to express my thanks to Mr CTM Nagesh, MBA, Assistant Professor**,** for giving me immense support and inspiration for undertaking this study.

Lastly but not the least, I pay my gratitude to my parents, family members, friends, staff of **Dr. Gundupagi Manjunath, Principal** and faculty members of Bheemireddy Institute of Management Science for their moral support and whole hearted co-operation in drafting this report.

CHAPTER - 1

INTRODUCTION

1.1. INTRODUCTION:

[1] Employee engagement refers to the emotional and psychological connection employees have with their work, teams, and organization, which drives their commitment and performance. Worker engagement goes past exercises, diversions, and occasions. Worker engagement drives execution. Locked in workers see at the entire of the company and get it their reason, where, and how they fit in. This leads to way better decision-making. Organizations with an locked in workforce outflank their competition. They have a higher gaining per share (EPS) and recoup more rapidly after retreats and budgetary mishaps. Engagement is a key differentiator when it comes to development and innovation.

A farther workforce is physically less associated to a company‘s central center of action, which implies individuals may miss out on communal social occasions like group snacks, celebrating colleagues‘ birthdays, water-cooler discussions, and other casual minutes that make a bunch of people feels like a group. It‘s an nonappearance that‘s felt over the organization.

Gallup portrays locked in workers as those who feel —involved in, excited around, and committed to their work and work environment, Portion of which comes from their conviction in the straightforwardness of their company and colleagues. Tragically, numerous organizations‘ pioneers aren‘t doing sufficient to make workers feel educated: 55% of trade proprietors accept they‘re exceptionally straightforward, but as it were 18% of their representatives concur.

When workers need clarity and setting, they feel out of the Disengaged, which eventually leads to separation, so much so that they might not indeed voice their suppositions. These communication crevices can harmed efficiency and resolve in the long run. Without legitimate input from directors, workers are twice as likely to say they‘ll stopped since they feel like they‘ve been taken for allowed. Disappointment to work comprehensively with a farther group can moreover harmed a business‘s foot line.

[1] https://www.coursera.org/enterprise/articles/what-is-remote-employee-management

Remote working has become a fundamental shift in the modern workplace, transforming how employees interact, collaborate, and stay engaged. The transition from traditional office settings to remote work, accelerated by technological advancements and global circumstances, has introduced both opportunities and challenges for organizations. Employee engagement, a crucial factor in productivity and job satisfaction, is significantly impacted by remote work dynamics, including communication barriers, isolation, and work-life balance concerns.

Understanding engagement levels during remote working is essential for businesses to foster a motivated workforce, improve job satisfaction, and ensure long-term organizational success in an increasingly digital work culture.

The concept of remote working has gained significant prominence in recent years, reshaping traditional workplace structures and redefining how employees engage with their work. While remote work offers benefits such as flexibility, cost savings, and increased autonomy, it also presents challenges related to employee engagement, communication, collaboration, and overall productivity. Organizations worldwide, including those in the IT sector, have had to adapt to these changes by implementing digital collaboration tools, redefining work policies, and finding new ways to keep employees motivated.

This study aims to analyze the impact of remote working on employee engagement by identifying the key factors that influence motivation, performance, and job satisfaction. It will explore the role of leadership, workplace culture, digital communication tools, and employee well-being in fostering engagement in a remote setting. Additionally, the study will assess the challenges employees face, including feelings of disconnection, lack of recognition, and the blurred boundaries between work and personal life.

By understanding these dynamics, organizations can develop effective strategies to improve remote work policies, enhance employee morale, and create a more inclusive and engaging virtual work environment. As remote work continues to evolve, companies must adopt innovative approaches to ensure their workforce remains **motivated, productive, and connected**, ultimately leading to long-term business success.

[2]Engage Employee

1. Clear Communication & Collaboration

- Utilize multiple communication channels like Slack, Microsoft Teams, and Zoom for daily check-ins.
- Set clear expectations regarding tasks, deadlines, and performance metrics to align employees with organizational goals.
- Encourage open discussions and feedback loops to foster transparency and trust.
- Implement asynchronous communication methods (emails, recorded video updates) for flexibility in different time zones.
- Conduct regular virtual town hall meetings to keep employees updated on company progress, goals, and major decisions.

2. Virtual Team Bonding & Recognition

- Organize virtual team-building activities like quizzes, happy hours, game nights, or escape rooms to enhance teamwork.
- Recognize and reward employees' efforts with shoutouts, incentives, or bonuses.
- Celebrate birthdays, work anniversaries, and achievements through virtual appreciation events.
- Create a peer-to-peer recognition program where employees can nominate colleagues for their contributions.
- Launch employee engagement challenges (e.g., step-count contests, hobby-sharing days, or book clubs).

[2] https://en.wikipedia.org/wiki/Remote_work?utm_source

3. Support Employee Well-being

- Encourage flexible working hours to balance work-life responsibilities and prevent burnout.
- Provide mental health support through online counseling, stress management webinars, and wellness programs.
- Promote virtual fitness challenges, mindfulness sessions, or yoga classes to encourage healthy habits.
- Offer an employee assistance program (EAP) that provides confidential counseling and mental health support.

4. Encourage Professional Growth

- Offer online training, workshops, and career development programs tailored to individual employee goals.
- Provide mentorship and upskilling opportunities by pairing employees with experienced leaders.
- Create a learning culture through knowledge-sharing sessions, virtual lunch-and-learn events, and industry expert talks.
- Support employees in obtaining certifications relevant to their roles by covering training costs.
- Implement a structured career progression plan to help employees envision long-term growth within the company.

5. Enhance Employee Autonomy & Empowerment

- Allow employees to have control over their schedules, enabling them to work when they are most productive.
- Encourage employees to take ownership of projects by giving them the flexibility to experiment with new ideas.
- Set up cross-functional collaboration opportunities where employees can contribute to different projects beyond their primary role.

6. Strengthen Leadership & Managerial Support

- Train managers to lead with empathy, ensuring they check in on employees' well-being and workload regularly.
- Encourage a culture of trust where employees feel comfortable discussing challenges without fear of repercussions.
- Provide leadership development programs to help managers improve remote team management skills.
- Ensure managers conduct one-on-one meetings with employees to provide guidance, listen to concerns, and offer career advice.

7. Improve Employee Engagement through Technology & Innovation

- Use AI-powered chatbots or virtual assistants to streamline employee queries and provide instant responses.
- Leverage gamification strategies in training and performance tracking to keep employees motivated.
- Implement digital dashboards where employees can track their performance metrics and receive real-time feedback.
- Provide stipends for remote work setups, including ergonomic chairs, noise-canceling headphones, or high-speed internet support.

[3]Source of Employee Engagement

1. Leadership & Management

- Strong leadership fosters trust, motivation, and a sense of purpose among employees.
- Open communication and transparent decision-making create a culture of honesty and reliability.
- Supportive and empathetic management ensures employees feel valued and heard.
- Leaders should provide clear goals, constructive feedback, and recognition for employee contributions.
- Encouraging innovation and allowing employees to take initiative enhances engagement.
- Regular one-on-one check-ins between managers and employees help address concerns and career aspirations.
- Leadership training programs equip managers with skills to handle remote and hybrid teams effectively.

2. Work Culture & Environment

- A culture of inclusivity and diversity ensures employees feel accepted and respected.
- Consistent recognition and appreciation for employee efforts boost morale and motivation.
- Organizations should foster a collaborative work environment that encourages teamwork and knowledge sharing.
- Establishing a feedback-driven culture helps employees contribute ideas and feel valued.
- Celebrating company milestones and achievements builds a sense of belonging.
- Encouraging employees to participate in decision-making processes increases ownership and commitment.

[3] https://en.wikipedia.org/wiki/Employee_engagement?utm_source,Types_of_employee_engagement

3. Job Satisfaction & Career Growth

- Clear career progression paths help employees set long-term goals within the organization.
- Opportunities for professional development, including mentorship programs, online courses, and workshops, enhance job satisfaction.
- Regular performance evaluations with actionable feedback ensure employees are aware of growth opportunities.
- Providing fair compensation, competitive benefits, and job security increases loyalty and motivation.
- Internal job rotations or lateral movement opportunities help employees explore new roles and responsibilities.
- Encouraging employees to pursue certifications and continued learning fosters long-term engagement.

4. Work-Life Balance

- Flexible working hours and remote work options allow employees to maintain a healthy personal and professional life balance.
- Mental health support, including counseling, wellness programs, and stress management sessions, is crucial for long-term engagement.
- Ensuring realistic workload distribution prevents burnout and promotes sustained productivity.
- Encouraging breaks, vacation time, and disconnecting from work after hours improves employee well-being.
- Implementing "no-meeting" days or designated quiet hours boosts focus and work efficiency.
- Offering parental leave, childcare support, and family-friendly policies fosters loyalty and engagement.

5. Employee Autonomy & Empowerment

- Trusting employees to make decisions within their roles increases their sense of responsibility.
- Allowing flexibility in work styles and project execution encourages creativity and ownership.
- Providing access to necessary tools and resources ensures employees can perform efficiently.
- Encouraging employees to take initiative in problem-solving and innovation drives engagement.
- A culture that supports independent thinking and self-driven projects leads to higher motivation.

6. Technological Support & Work Tools

- Ensuring employees have access to efficient digital tools and platforms enhances productivity.
- Using AI-driven insights and automation can reduce repetitive tasks, allowing employees to focus on meaningful work.
- Providing regular IT support ensures that employees do not face unnecessary technological disruptions.
- Encouraging the use of collaboration tools like Slack, Asana, and Microsoft Teams improves workflow.
- Offering stipends for home office setups helps remote employees work comfortably.

7. Social Responsibility & Purpose-Driven Work

- Employees feel more engaged when they work for a company that aligns with their values and ethics.
- Encouraging employees to participate in corporate social responsibility (CSR) initiatives fosters a sense of purpose.
- Organizing volunteering programs and environmental sustainability projects increases community involvement.
- Companies that emphasize ethical business practices and positive societal impact create a stronger emotional connection with employees.

[4]Why Employee Has to Engaged

Employee engagement is crucial for the success of both individuals and organizations. Engaged employees are more productive, motivated, and committed to their work, leading to higher efficiency and better results. When employees feel valued and connected to their roles, job satisfaction increases, reducing stress and burnout. A highly engaged workforce also results in lower employee turnover, saving companies the costs associated with hiring and training new staff. Additionally, engagement fosters innovation and creativity, encouraging employees to contribute ideas and take initiative. This positive mindset extends to customer interactions, leading to improved customer satisfaction and business growth. Furthermore, a culture of engagement promotes teamwork, collaboration, and a positive work environment, enhancing overall workplace morale. Organizations that prioritize employee engagement tend to experience higher profitability, reduced absenteeism, and a stronger brand reputation. Therefore, fostering employee engagement is essential for long-term business success and employee well-being.

[5] Styles of Employee Engagement

1. Clear Communication & Transparency

- Maintain open communication through regular meetings, emails, and feedback sessions.
- Encourage employees to express their opinions, concerns, and suggestions without hesitation.
- Use collaboration tools like Slack, Microsoft Teams, Zoom, and project management platforms like Asana or Trello.
- Set clear and realistic expectations regarding job responsibilities and deliverables.
- Implement a structured feedback system, including anonymous surveys, to gather employee insights.
- Create an internal knowledge-sharing platform where employees can collaborate and share best practices.

[4] https://www.shrm.org/in/topics-tools/news/employee-relations/what-why-employee-engagement
[5] https://www.aihr.com/blog/employee-engagement-strategies/

2. Recognition & Rewards

- Acknowledge employees' efforts through verbal praise, awards, and financial incentives.
- Implement a structured employee recognition program with bonuses, promotions, or appreciation messages.
- Celebrate milestones such as work anniversaries, birthdays, and professional achievements.
- Develop a peer recognition program where employees can nominate colleagues for outstanding contributions.
- Offer non-monetary rewards like extra time off, professional development opportunities, or special project assignments.
- Publicly recognize employees' efforts in company newsletters, team meetings, or internal social media platforms.
- Introduce gamification elements in employee recognition (e.g., badges, leaderboards, or points-based rewards).

3. Career Growth & Development

- Provide access to skill development through online training, workshops, and professional certifications.
- Offer mentorship programs where senior employees guide junior staff in career progression.
- Develop career pathways and succession plans to help employees visualize their future growth within the company.
- Encourage continuous learning through sponsored courses, certifications, and knowledge-sharing sessions.
- Create leadership development programs for employees aspiring for managerial roles.
- Assign stretch projects or cross-functional team opportunities to broaden employees' experience.
- Support employees in attending industry conferences, networking events, and professional seminars.

4. Work-Life Balance & Flexibility

- Encourage employees to take regular breaks to prevent burnout and improve productivity.
- Implement "no-meeting" days or flexible meeting schedules to reduce virtual fatigue.
- Support mental and physical well-being through wellness programs, therapy sessions, and guided meditation activities.
- Offer flexible working hours or a hybrid work model to accommodate personal and professional responsibilities.
- Provide paid leave policies, including parental leave, mental health days, and sabbatical options.
- Encourage employees to disconnect after work hours by setting clear work boundaries.
- Introduce fun activities like virtual coffee breaks, interest-based clubs, or fitness challenges to enhance social interactions.
- Provide stipends for ergonomic home office setups to support remote work efficiency.

5. Employee Autonomy & Empowerment

- Foster a trust-based work environment where employees feel confident in making independent choices.
- Allow employees to set personal and professional development goals aligned with company objectives.
- Implement a results-driven work culture where productivity is measured by output rather than hours worked.
- Provide opportunities for employees to contribute ideas and innovations through brainstorming sessions or suggestion programs.

6. Social Responsibility & Community Engagement

- Encourage employees to participate in corporate social responsibility (CSR) initiatives such as volunteering or charity drives.
- Organize community engagement activities like fundraising events, sustainability projects, or mentorship programs.
- Support employees in aligning their work with causes they care about by offering time off for volunteering.
- Develop partnerships with non-profits or local organizations to foster a sense of purpose within the company.

• Talina Mishra and Lalatendu Kesari Jena(2020) Aims at integrating the conception of spare in the world of virtual leadership by continuously engaging workers and structure effective brigades to increase the effectiveness of digital workplaces. The findings of the study revealed that spare leadership can serve as a great way to boost hand morale and enrich their experience in times of global extremity. workers can effectively contribute to the association with the help of virtual spare brigades and tools.

• Julyan Adhitamaa, Setyo Riyanto(2020) It's grounded on the influence of work terrain on hand engagement and hand performance. The results showed that engagement and performance can be told by social union.

• Farheen Fathima Shaik, Upam Pushpak Makhecha(2019) It examines the motorists of hand engagement in global virtual brigades. This study uses the Job Demands- coffers proposition of hand engagement to decide the motorists of hand engagement in global virtual brigades. The authors conceptualized five motorists of hand engagement, videlicet, artistic intelligence, communication(formal and informal), technology, trust and individual maturity.

• Timothy D. Golden, Ravi S Gajendran(2019) Aims at discharging the part of a telecommuter ‘s job in their performance. Findings of the study reveals that for telecommuters who held complex jobs, for those in jobs involving low situations of interdependence and for those in jobs with low situations of social support, the extent of telecommuting had a positive association with job performance.

• Setyo Riyanto, Eny Ariyanto et al(2019) It examines the work life balance and its influence on hand engagement Y generation in courier service assiduity. The result revealed that it's important for the courier companies to continuously measure the hand workload for optimized the application of staffs.

• Setyo Riyanto(2019) It examines the effect of work terrain on flexible working hours, hand engagement and hand provocation. The results show that there's an influence of work life balance and flexible working hours on hand engagement. According to the results, hand provocation has the effect of interceding between work terrain and flexible working hours on hand engagement.

• Vic Benuyenah, Bistra Boukareva(2018) illustrates the changing trends in the field of HR. The paper focuses on professional experience of the authors in tutoring and developing HR curriculam as well as literature illustrations from work- grounded literacy. The result of the study revealed that To achieve applicability, HR curriculam need to concentrate more on professional work-grounded chops that are material to the contemporary plant andre-structure test formats to be in line with chops needed in the HR profession.

•(Jason C. Gawke, Marjan J. Gorgievski, Arnold B. Bakker, 2017) It seeks to examine hand intrapreneurship and hand engagement. The result revealed attestations for a positive gain cycle of hand intrapreneurial geste

, particular coffers, and work engagement. The practical recrimination of this study is that intermediating to increase either one of these constructs can be anticipated to lead to collective earnings in the others.

• Schrita Osborne, Mohamad S. Hammoud(2017) It examines the effective hand engagement in the plant. Three themes surfaced from the exploration prices and recognition, empowering workers, and erecting a bond between leaders and employees. However, they could produce growth eventuality for the association, If business leaders incorporate these three themes into their leadership practice.

• Felstead, A., Henseke, G.(2017) The growth of remote working and its consequences for trouble, well- being and work- life balance. The study further revealed that remote working is associated with advanced organizational commitment, job satisfaction and job- related well- being; these benefits come at the cost of work intensification and a lesser incapability to switch off.

• Collins, A et al(2016) It identifies the social support in the plant between teleworkers, office grounded associates and administrators. The study set up out differences between office- grounded and endless teleworking staff in terms of social support. In discrepancy social support was more important for office- grounded workers, who valued co- worker connections with other office-grounded staff.

• Dharma Raju Bathini & George Kandathil(2015) It identifies the converse on work from home in global and Indian surrounds. The result showed that architecture of work from home as an hand benefit creates normative pressures on workers to consolidate their work. The result also revealed that current converse, which portrays work from home as an employer cost and contemporaneously an hand benefit, can steepen the normative pressures on workers, creating undesirable issues.

• Thushel Jayaweera(2015) The relationship between work environmental factors and job performance with work provocation and the extent to which this relationship is intermediated by work provocation. The results point to the significance of working conditions and work provocation in explaining job performance of hostel workers in the frame of work environmental conditions and job performance.

RESEARCH METHODOLOGY

This study employs a **descriptive research design** to analyze employee engagement in remote work. A **quantitative approach** was used, collecting **primary data** through a structured **survey** from **130 respondents** across various industries. **Secondary data** was gathered from academic journals, industry reports, and case studies. A structured questionnaire covered demographics, engagement factors, communication, productivity, and work-life balance. **Percentage analysis, correlation, and thematic analysis** were used for data interpretation. Limitations include sample size constraints, potential response bias, and assumptions about digital accessibility. The study aims to provide insights into improving remote work engagement and workplace strategies.

OBJECTIVES OF THE STUDY

1. To study the employee engagement through working from home.
2. To observe the effectiveness of the communication between the employee and the manager.
3. To observe the social connectedness among the employees while remote working.
4. To determine the career growth while remote working.

SCOPE OF THE STUDY

The compass of the study is to understand the hand engagement through remote work culture and how far people have acclimated to the new way of working. The study helps in bringing out the opinion of the repliers on their connections with their directors andco-workers. The study further identifies work life balance while working from home and brings about the problem that the repliers constantly face while working from home.

Need for the study:

The transition to remote work has reshaped workplace dynamics, making employee engagement essential for productivity and well-being. While remote work offers flexibility, it also brings challenges like isolation, communication gaps, and work-life balance issues. These factors affect motivation and performance.

Strong leadership, digital tools, and mental health support are crucial for sustaining engagement. This study explores remote work's impact on engagement, identifying best practices for motivation and collaboration. Insights will guide organizations in fostering a connected and engaged workforce, ensuring long-term success in the evolving work landscape.

LIMITATIONS

- This study was conducted among 130 respondents.
- The study assumes all employees have access to stable internet and digital tools, which is not always the case
- Employees work in different home setups, facing unique distractions and challenges that can affect engagement.
- Employee experiences vary based on personal responsibilities, such as childcare or household duties, affecting engagement.

CHAPTER-III

INDUSTRY &COMPANY PROFILE

1.2 INDUSTRY PROFILE:

India’s IT and software services industry is a global leader, contributing significantly to the country’s GDP and exports. The sector is expected to reach $350 billion by 2025, driven by digital transformation, cloud computing, AI, and enterprise solutions. Key segments include software development, IT consulting, cloud services, web and mobile app development, and business process management. The industry is highly competitive, with large players like TCS, Infosys, and Wipro, alongside mid-sized firms such as InnoSoul Information Technologies Pvt. Ltd., which provide specialized solutions. Growth is fueled by increasing global outsourcing demand, government initiatives like Digital India, and advancements in AI and automation. However, challenges such as talent shortages, regulatory compliance, and cybersecurity threats persist. The future outlook remains strong, with companies focusing on AI-driven applications, cloud-based services, and expanding global footprints.

India’s IT and software services industry is a key driver of economic growth, contributing significantly to GDP and exports while positioning the country as a global technology hub. The sector, which is expected to reach $350 billion by 2025, is fueled by rapid digital transformation, increasing adoption of cloud computing, AI, and enterprise solutions. It encompasses various segments, including software development, IT consulting, cloud services, web and mobile app development, and business process management, with companies offering custom and off-the-shelf software solutions across diverse industries. The industry is highly competitive, led by major players like TCS, Infosys, and Wipro, alongside mid-sized firms such as InnoSoul Information Technologies Pvt. Ltd., which specialize in software publishing, IT consulting, and web design. Growth is driven by strong demand for digital solutions, a skilled workforce, cost advantages, and supportive government initiatives such as Digital India and Startup India, which encourage IT innovation and entrepreneurship. Additionally, the increasing shift towards AI, machine learning, and automation is transforming business processes, enabling companies to enhance efficiency and scalability. Despite the robust growth, challenges persist, including a shortage of skilled professionals, evolving data privacy regulations, and rising cybersecurity threats, necessitating continuous investment in talent development and security frameworks. Looking ahead, the future of India's IT industry remains promising, with organizations increasingly focusing on AI-driven applications, SaaS-based business models, blockchain technology, and global expansion, reinforcing India’s position as a leading provider of software solutions and IT services worldwide.

INDIAN COMPANIES WITH WORK FROM HOME POLICY

1. Hike
2. TATA Consultancy Services
3. Infosys
4. Unacademic
5. Razor pay
6. IBM India
7. OYO

Company Profile: InnoSoul Information Technologies Pvt. Ltd.

1. Overview

InnoSoul Information Technologies Private Limited is a leading IT solutions provider specializing in **software publishing, consultancy, and IT services**. Established on **December 9, 2003**, the company has over **21 years of experience** in delivering **custom software solutions, software maintenance, and web development**.

2. Company Details

- **Company Name:** InnoSoul Information Technologies Private Limited
- **CIN:** U72200TG2003PTC042192
- **Company Status:** Active
- **Listed on Stock Exchange:** Unlisted
- **ROC:** ROC Hyderabad
- **Registration Number:** 42192
- **Company Category:** Company limited by shares
- **Company Sub Category:** Non-government company
- **Class of Company:** Private

3. Business Activities

InnoSoul operates in the **software publishing and IT services industry**, offering **customized software solutions, consultancy services, and web design**. The company caters to diverse industries by providing tailored IT solutions to meet specific client needs.

4. Services Offered

- **Software Publishing & Development** – Production, documentation, and supply of ready-made and custom software solutions.
- **IT Consulting & Solutions** – Analyzing client needs and providing tailored IT strategies.
- **Web Development & Design** – Creating user-friendly and responsive websites.
- **Software Maintenance & Support** – Ensuring efficient operation and continuous improvement of software applications.

5. Industry & Market Position

The company operates in the rapidly growing **IT and software services sector**, serving domestic and international clients. It competes with mid-sized IT firms while contributing to India's digital transformation.

6. Vision & Mission

- **Vision:** To be a leading provider of innovative IT solutions, driving business efficiency and digital transformation.
- **Mission:** To deliver high-quality, customized software and IT services that align with client requirements and industry standards.

7. Future Outlook

InnoSoul Information Technologies Pvt. Ltd. aims to expand its **technological capabilities, integrate AI-driven solutions, and strengthen its global presence** to remain competitive in the evolving IT industry.

CHAPTER IV

DATA ANANLYSIS

&

INTERPRETATION

DATA ANALYSIS AND INTERPRETATION

4.1. PERCENTAGE ANALYSIS

Table 4.1.1: Age of the respondents

S.NO	AGE	NO.OF RESPONDENTS	PERCENTAGE
1	18-25	82	63.1%
2	26-33	17	13.1%
3	34-41	15	11.5%
4	41 & above	16	12.3%
TOTAL		130	100%

Source: Primary data.

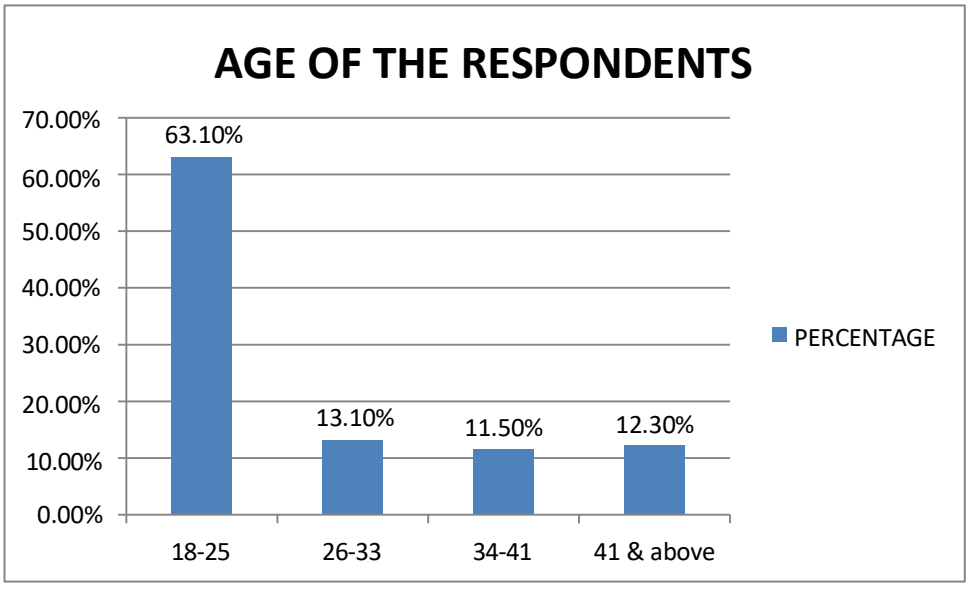

Chart 4.1.1: Age of the respondents

Interpretation: The data reveals that the majority of respondents (63.1%) fall within the 18-25 age group, while 13.1% belong to the 26-33 age group. The 34-41 age group accounts for 11.5%, and respondents aged 41 and above constitute 12.3%.

Inference:

Most respondents (63.1%) are between 18 and 25 years old.

Table 4.1.2: Gender of the respondents

S.NO	GENDER	NO. OF RESPONDENTS	PERCENTAGE
1.	Male	73	56.2%
2.	Female	57	43.8%
TOTAL		130	100.00

Source: Primary data.

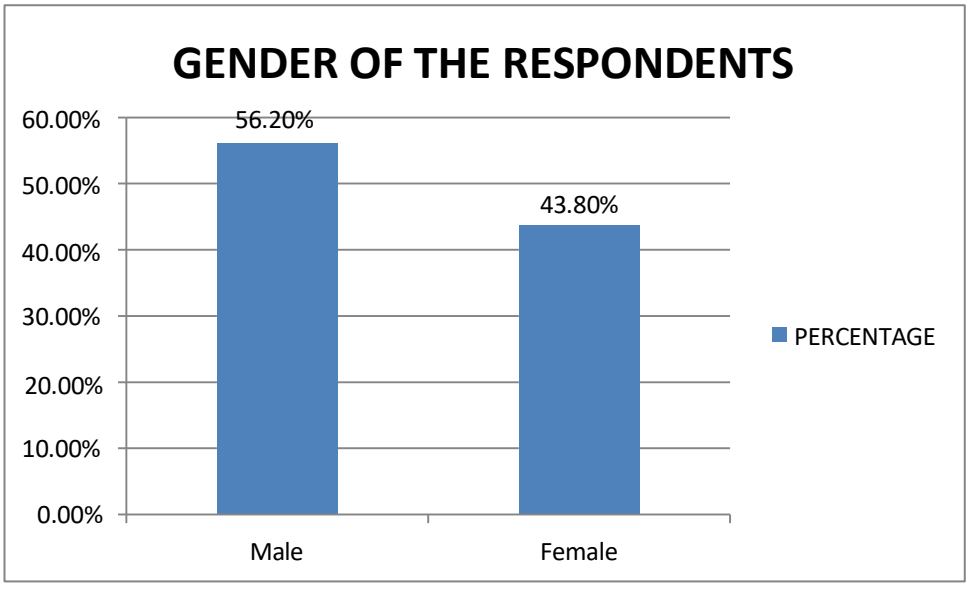

Chart 4.1.2: Gender of the respondents

Interpretation: The survey shows that 56.2% of respondents are male, while 43.8% are female.

Inference: Males constitute the majority (56.2%) of the respondents.

Table 4.1.3: Job role of the respondents

S.NO	JOB ROLE	NO. OF RESPONDENTS	PERCENTAGE
1	Junior level	30	23.1%
2	Medium level	56	43.1%
3	Senior level	44	33.8%
TOTAL		130	100

Source: Primary data

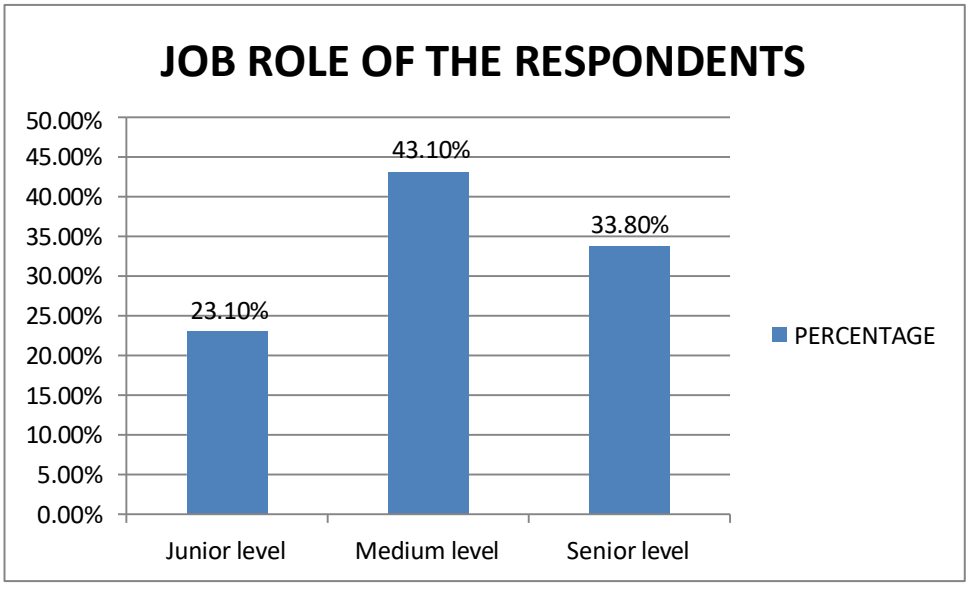

Table 4.1.3: Job Role

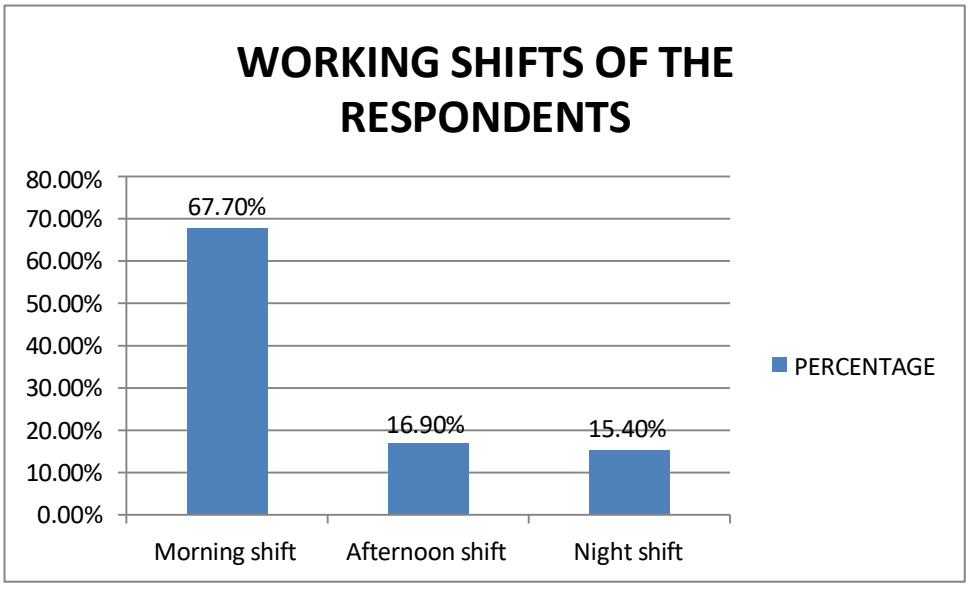

Interpretation: The survey results indicate that 23.1% of respondents hold junior-level positions, 43.1% are in mid-level roles, and 33.8% occupy senior-level positions.

Inference: The majority (43.1%) of respondents work in mid-level roles.

Table 4.1.4: Working shifts of the respondents

S.NO	SHIFTS	NO. OF RESPONDENTS	PERCENTAGE
1	Morning shift	88	67.7%
2	Afternoon shift	22	16.9%
3	Night shift	20	15.4%
TOTAL		130	100%

Source: Primary data

Charts 4.1.4: Working shifts of the respondents

Interpretation

From the above table it is evident that 67.70% of the respondents work in morning shift, 16.90% of the respondents work in the afternoon shift and 15.4% of the respondents work in the night shift.

Inference

Majority (67.70%) of the respondents work in the morning shift.

Table 4.1.5: Respondents working remotely

S.NO	REMOTE WORKING	NO. OF RESPONDENTS	PERCENTAGE
1	Permanently	43	33.1%
2	Since covid 19	87	66.7%
TOTAL		130	100

5	Strongly disagree	3	2.30%
TOTAL		130	100

Source: Primary data

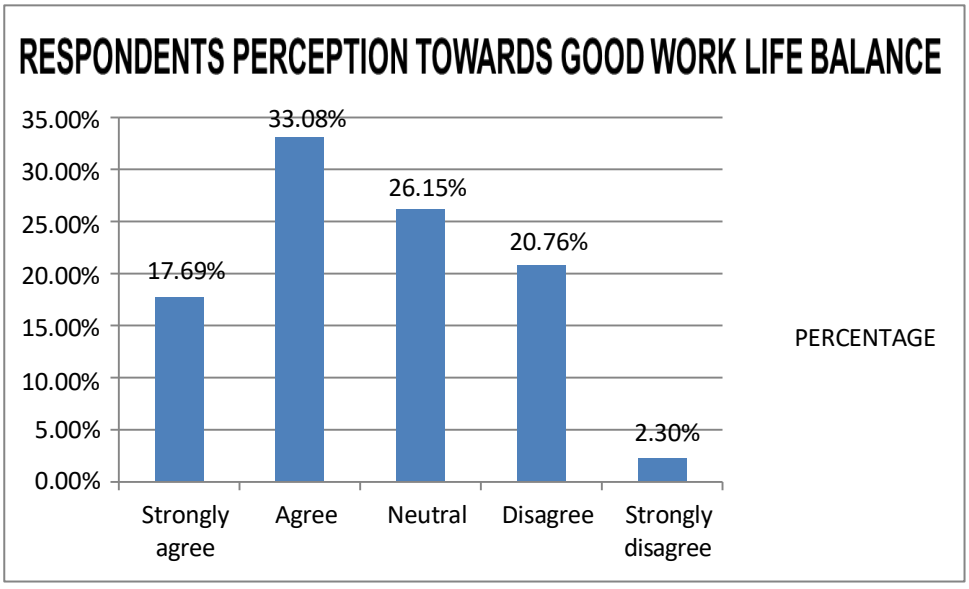

Chart 4.1.9: Respondents perception towards good work life balance

Interpretation

From the above table it is evident that 17.69% of the respondents strongly agree that they have a good work life balance, 33.08% of the respondents agree that they have a good work life balance, 26.15% of the respondents are neutral about it while 20.76% of the respondents disagree with it and 2.30% of the respondents strongly disagree with it.

Inference

Majority (33.08%) of the respondents strongly agree that they are enthusiastic about the job because of good work life balance.

Table 4.1.10: Respondents aligned with the organizational goals

S.NO	RESPONSES	NO. OF RESPONDENTS	PERCENTAGE
1	Strongly agree	54	41.5%
2	Agree	48	36.9%
3	Neutral	26	20%
4	Disagree	2	1.5%
TOTAL		130	100%

Source: Primary data

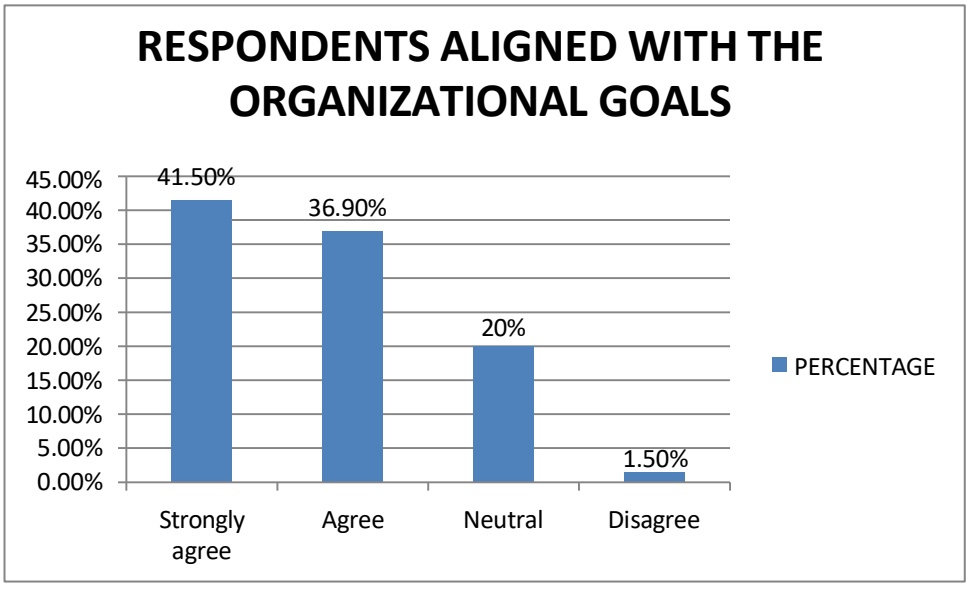

Chart 4.1.10: Respondents aligned with the organizational goals

Interpretation

From the above table it is clear that 41.50% of the respondents strongly agree that they are aligned with the organizational goals, 36.90% of the respondents agree that they are aligned with the organizational goals while 20% of them are neutral and 1.50% of the respondents disagree with it.

Inference

Majority (41.50%) of the respondents strongly agree that they are aligned with the organizational goals.

Table 4.1.11: Comfort in Sharing Feedback or Concerns with Manager Remotely

Response	No. of Respondents	Percentage
Yes, always	40	30.8%
Sometimes	55	42.3%
Rarely	20	15.4%
No	15	11.5%
Total	130	100%

Source: Primary data

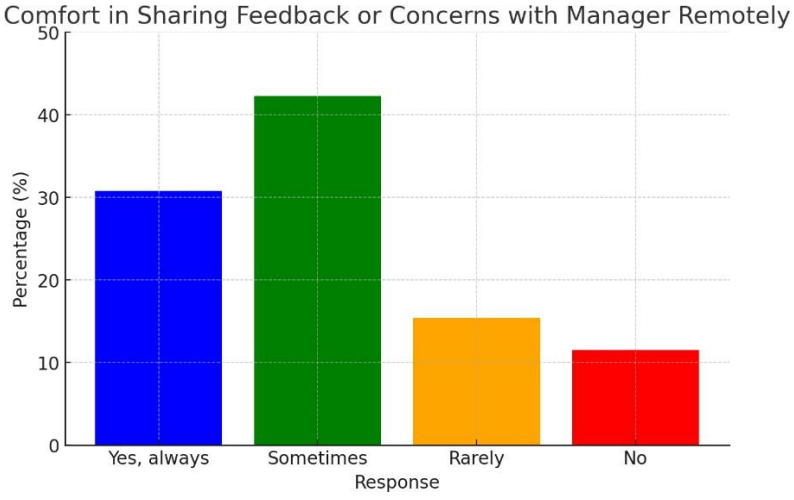

Chart 4.1.11: Comfort in Sharing Feedback or Concerns with Manager Remotely

Interpretation

The majority (73.1%) of employees feel comfortable sharing feedback remotely (**30.8% always, 42.3% sometimes**), while **26.9% (15.4% rarely, 11.5% no)** hesitate, indicating a need for better communication and trust-building.

Inference

Organizations should improve transparency and trust as 26.9% of employees hesitate to share feedback remotely.

Table 4.1.12: Impact of Remote Working on Productivity

Response	No. of Respondents	Percentage
Increased Productivity	60	46.2%
No Change	40	30.8%
Decreased Productivity	30	23.0%
Total	130	100%

Source: Primary Data

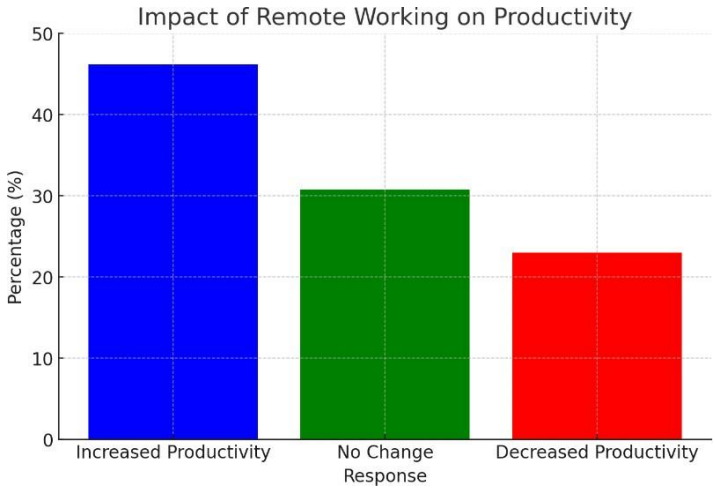

Chart 4.1.12: Impact of Remote Working on Productivity

Interpretation:

Remote work boosted productivity for **46.2%** of employees, had no impact on **30.8%**, and reduced productivity for **23.0%**, indicating mixed experiences.

Inference:

Organizations should optimize remote work strategies to sustain productivity gains while addressing challenges faced by the **23.0%** with decreased efficiency.

Table 4.1.13: Biggest Factors Affecting Productivity

Factors	No. of Respondents	Percentage
Lack of Supervision	40	30.8%
Distractions at Home	50	38.5%
Poor Internet Connectivity	25	19.2%
Unclear Expectations	35	26.9%
Other	20	15.4%
Total Responses	**130**	**100%**

Source: Primary Data

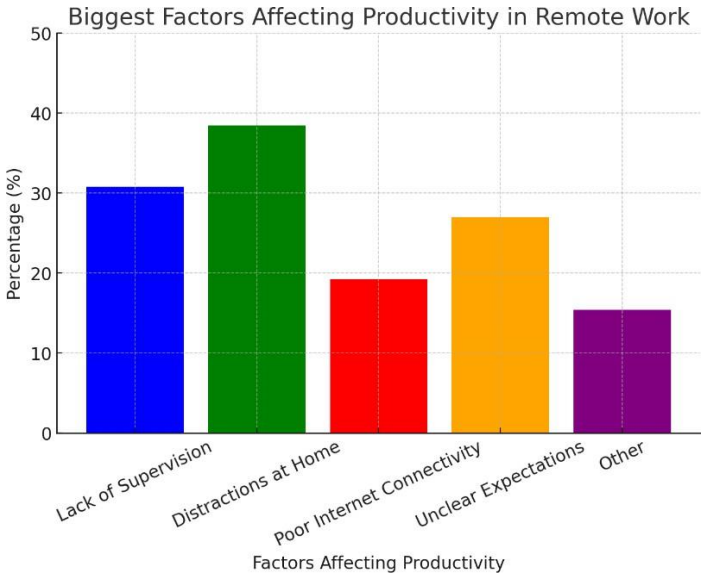

Chart 4.1.13: Biggest Factors Affecting Productivity

Interpretation;

The biggest factor affecting productivity is **distractions at home (38.5%)**, followed by **lack of supervision (30.8%)**, while **poor internet connectivity (19.2%)** and **unclear expectations (26.9%)** also contribute significantly.

Inference ;

To enhance remote work productivity, organizations should address home distractions, provide clearer expectations, and improve virtual supervision strategies.

Table 4.1.14: Learning and Development Opportunities for Remote Employees

Response	No. of Respondents	Percentage (%)
Yes, regularly	50	38.5%
Occasionally	45	34.6%
Rarely	20	15.4%
No	15	11.5%
Total	**130**	**100%**

Source: Primary Data

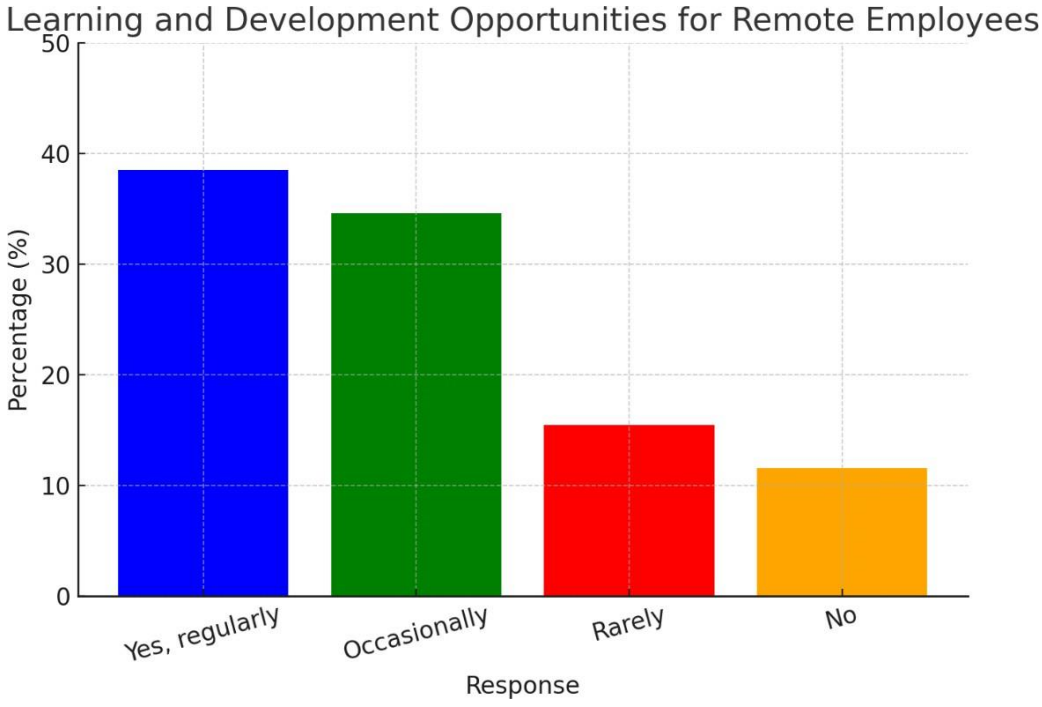

Chart 4.1.14: Learning and Development Opportunities for Remote Employees

Interpretation ;

Most respondents (38.5%) state that their company **regularly** provides learning and development opportunities, while 34.6% receive them **occasionally**.

Inference ;

Companies should enhance learning initiatives for remote employees to ensure continuous skill development and career growth.

Table 4.1.15: Preferred Professional Development Programs

Professional Development Program	No. of Respondents	Percentage (%)
Online training courses	65	50.0%
Virtual mentorship programs	40	30.8%
Career coaching sessions	20	15.4%
Other	5	3.8%
Total Responses	**130**	**100%**

Source: Primary Data

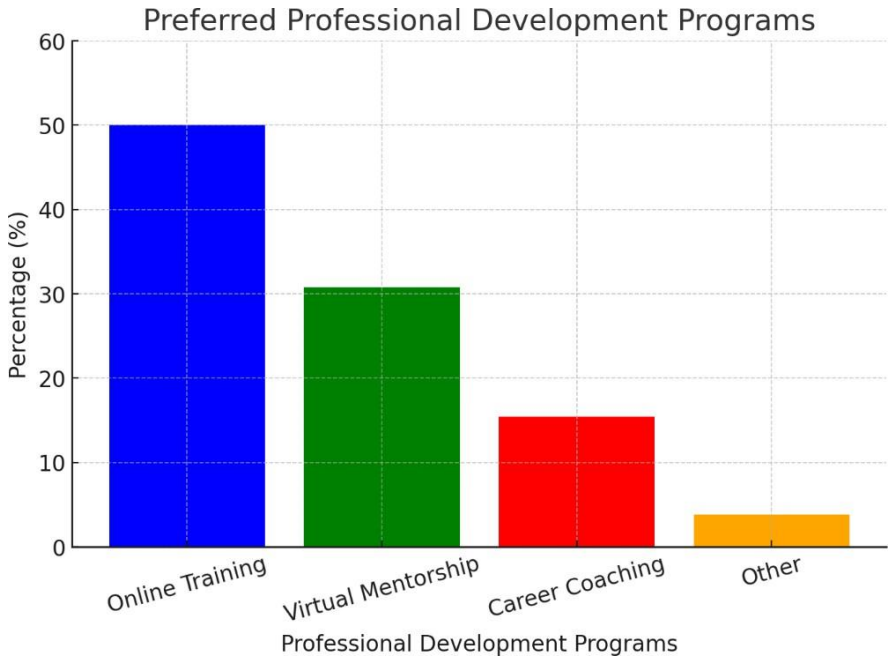

Chart 4.1.15: Preferred Professional Development Programs

Interpretation ;

Online training courses (50%) are the most preferred professional development option, followed by virtual mentorship programs (30.8%).

Inference ;

Organizations should focus on providing more online training courses and mentorship programs to support employees' professional growth.

Table 4.1.16: Work-Life Balance Improvement with Remote Work

Response	No. of Respondents	Percentage (%)
Strongly Agree	35	26.9%
Agree	50	38.5%
Neutral	25	19.2%
Disagree	12	9.2%
Strongly Disagree	8	6.2%
Total	**130**	**100%**

Source: Primary Data

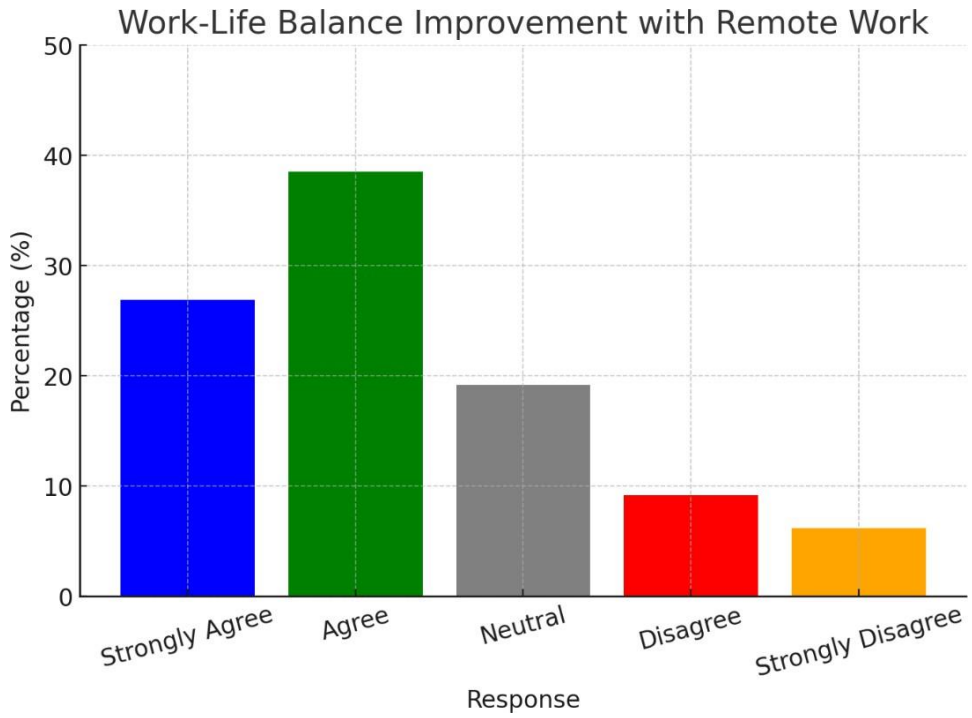

Chart 4.1.16: Work-Life Balance Improvement with Remote Work

Interpretation ;

Most respondents (38.5%) agree that remote work has improved their work-life balance, while 15.4% disagree.

Inference;

Remote work generally enhances work-life balance, but some employees still struggle with maintaining it.

CHAPTER 5

1.1 FINDINGS

- The majority (63.1%) of respondents are aged between 18 to 25 years, followed by 13.1% in the 26-33 age group.
- Male employees (56.2%) outnumber female employees (43.8%).
- A significant portion (43.1%) hold mid-level positions, while 23.1% work at the junior level, and 33.8% hold senior-level roles.
- Most employees (67.7%) work in the morning shift, while 16.9% and 15.4% work in the afternoon and night shifts, respectively.
- A majority (66.7%) of respondents started working remotely due to the COVID-19 pandemic, while 33.1% have a permanent remote work setup.
- Only 33.8% of organizations provide work-from-home (WFH) facilities upon request, while 27.7% offer them only to senior employees, and 26.9% limit them to freshers.
- About 11.5% of organizations do not provide any WFH facilities.
- The majority (52.3%) perceive remote work as challenging, citing difficulties such as work intensification, constant online presence, and lack of face-to-face communication.
- Approximately 48.5% of respondents experience "online presenteeism," where they feel the pressure to always be available.
- Work-related stress and fatigue are reported by 40% of employees, highlighting the need for better work-life balance strategies.
- A significant 42.3% of respondents strongly agree that their organizations provide a good remote work culture, while 26.9% agree, and 20.7% remain neutral.
- About 41.5% of employees strongly agree that they are aligned with their organization's goals, while 36.9% agree.
- Work-life balance satisfaction is relatively moderate—33.1% of respondents agree that remote work has improved work-life balance, while 26.1% remain neutral and 20.7% disagree.
- Supervisor support is acknowledged by 37.7% of employees, but a notable portion remains neutral or dissatisfied with leadership involvement.
- Peer support is strong, with 36.9% of employees agreeing that their coworkers assist them when needed.

- The majority (44.6%) agree that remote work allows them to complete tasks on time, while 37.7% report receiving sufficient assistance from colleagues.
- However, unclear expectations and lack of supervision negatively impact productivity for some employees.
- Organizations with structured remote work policies tend to have better engagement and efficiency among employees.

5.2 SUGGESTION

- Organization must work on to reduce work intensification.
- Hybrid model is the most suggested work model.
- A strict work time has to be regulated so that the employees could ensure a better work life balance.
- The organization must conduct fun events regularly so as to ensure better connectivity among workers.

5.3 CONCLUSION

The engagement of employees at remote workplace is a difficult task. The communication between employee-employer and employee-employee has restricted non work related interaction. Now the communication is limited to work related interactions alone. Remote work model is definitely a future work model but for the young people who have started their career amidst pandemic are finding it comfortable but is damaging in the long run.

Questionnaire on Employee Engagement During Remote Working

1. Name: _____

2. Age:
   - [ ] 18-25
   - [ ] 26-33
   - [ ] 34-41
   - [ ] 41 & above

3. Gender:
   - [ ] Male
   - [ ] Female
   - [ ] Other

4. Job Role:
   - [ ] Junior Level
   - [ ] Mid-Level
   - [ ] Senior Level

5. How long have you been working remotely?
   - [ ] Permanently
   - [ ] Since COVID-19

6. What shift do you work?
   - [ ] Morning
   - [ ] Afternoon
   - [ ] Night

7. Does your company provide work-from-home facilities?
   - [ ] Yes, for all employees
   - [ ] Only for freshers
   - [ ] Only for senior employees
   - [ ] Only on request
   - [ ] No, not at all

8. What challenges do you face while working remotely? (Select all that apply)
   - [ ] Work intensification
   - [ ] Online presenteeism
   - [ ] Family distractions
   - [ ] Limited regular breaks
9. Do you feel aligned with your organization's goals?
   - [ ] Strongly agree
   - [ ] Agree
   - [ ] Neutral
   - [ ] Disagree
10. Does your organization provide a good remote work culture?
   - [ ] Strongly agree
   - [ ] Agree
   - [ ] Neutral
   - [ ] Disagree
11. How satisfied are you with work-life balance in remote working?
   - [ ] Highly satisfied
   - [ ] Satisfied
   - [ ] Neutral
   - [ ] Dissatisfied
12. Do you feel comfortable sharing feedback or concerns with your manager remotely?
   - [ ] Yes, always
   - [ ] Sometimes
   - [ ] Rarely
   - [ ] No
13. Has remote working affected your productivity?
   - [ ] Increased productivity
   - [ ] No change
   - [ ] Decreased productivity

14. What are the biggest factors affecting your productivity? (Select all that apply)
- [ ] Lack of supervision
- [ ] Distractions at home
- [ ] Poor internet connectivity
- [ ] Unclear expectations
- [ ] Other: _____

15. Does your company provide learning and development opportunities for remote employees?
- [ ] Yes, regularly
- [ ] Occasionally
- [ ] Rarely
- [ ] No

16. What kind of professional development programs would you like to have? (Select all that apply)
- [ ] Online training courses
- [ ] Virtual mentorship programs
- [ ] Career coaching sessions
- [ ] Other: _____

17. Do you feel your work-life balance has improved with remote work?
- [ ] Strongly agree
- [ ] Agree
- [ ] Neutral
- [ ] Disagree
- [ ] Strongly disagree
